Tul Continues Its Strong Partnership with CyberLink

Offering the ultimate bundles for the enthusiast and mainstream markets

TAIPEI, TAIWAN (July 26, 2005) – Tul Corporation today announces the latest contract with CyberLink Corp. – the world's leading software provider for digital video and audio technologies. Tul continues to work together with the CyberLink in order to offer the best bundles of graphics cards and DVD-solution software to the enthusiast and mainstream markets – the easiest solution to upgrade PCs to the digital entertainment centers.

Beginning in July 2005, the contract between Tul and CyberLink focuses on the 3D image enhancement. Therefore, Tul offers the Video-In-Video-Out (VIVO) functions on its middle- to high-end graphics cards, as well as building-in the latest quality-enrichment technologies such as SMOOTHVISION™ HD, HYPER Z™ HD and VIDEOSHADER™ HD. Through bundling with CyberLink's 6-in-1 DVD Solutions, users are able to turn their PCs into the ideal entertainment centers by enjoying the availabilities of authoring and burning videos, photos and data onto CD/DVDs, and the easiness of downloading the latest versions from the Internet.

"We are thrilled to carry on the close cooperation with CyberLink," says Ted Chen, C.E.O. of Tul Corporation. "By offering CyberLink's finest software bundle on our graphics cards, we can keep our promises of providing the cutting-edge technologies that bring the high-definition gaming to a newest height, and fulfilling our users' needs with the super-charged performance," continues Chen.

"CyberLink's 6-in-1 software suite, DVD Solution, complements Tul's graphics cards with leading DVD burning and creativity features," says Alice H. Chang, C.E.O. of CyberLink Corp. "From authoring DVDs, creating multimedia slideshows and editing video, to data and music burning and home theater DVD playback, this bundle gives users the best experience they can have with Tul's advanced graphics cards."

CyberLink DVD Solution for TUL incorporates the PowerDVD 6 to playback DVD, PowerProducer 3 to create movies and photos on CDs or DVDs, PowerDirector 3 to edit videos, Power2Go 4 to burn data and music and Medi@show 3 to create multimedia slideshows - above applications are all integrated together and come with an user-friendly interface, PowerStarter, which is organized

About CyberLink Corp.

Founded in 1995, CyberLink Corp. is a world leader and pioneer in providing integrated solutions for the Digital Home. The products are categorized into two major lines: Digital Multimedia Solutions and Training Solutions. Digital Multimedia Solutions includes products focused on media creation technologies that capture, edit, author and record all types of media, and entertainment products that allow enjoyment of high quality media on the PC through state-of-the-art audio-video technologies. These award-winning applications are ideal solutions for turning today's mainstream computers into home theaters and digital video centers. The company's Training Solutions include authoring tools for creating training content and building training management systems that offer an easy and cost effective way to deliver training over corporate intranets or the Internet. As a result of the company's solid growth and profitability, CyberLink became a public company in October 2000 and is listed on the Taiwan Stock Exchange (5203.TW). To keep up with market demands, CyberLink has operations in North America, Europe, and the Asia Pacific region including Japan. CyberLink's corporate headquarters is in Taipei. <http://www.gocyberlink.com/>
